### 1. General Hazards Associated with Field Work:

- Slips, trips, falls - slippery or uneven terrain
- Electrical hazards associated with work activities
- Hand and portable power tools
- Overhead hazards
- Ergonomics (i.e. lifting, bending, reaching, twisting, repetitive motions, awkward postures, etc.)
- Temperatures extremes and weather (heat/cold stress)
- Poisonous plants, snakes, biting/stinging insects
- Noise from equipment (i.e. drill rigs, chainsaws, generators, etc.)
- Equipment inspections to complete (where applicable)
- Driving (seatbelt use, road conditions, hauling, etc.)
- Off road vehicle use (ATV, ATUV, snowmobile)
- Discuss emergency contact information/numbers, hospitals, first-aid locations, shelter in place locations, etc.
- Chemicals to be used (discuss the hazards and controls associated)
- Other:

### 2. Hazards Associated with Project Specific Work:

- Complete all checklists required by work control (i.e. boating, electrofishing, drilling, etc.)

### 3. Personal Protective Equipment (PPE):

- Hard hat
- Eye & face protection
- Hearing protection
- Respiratory protection
- Traffic Vest
- Protective apparel
- Gloves & arm protection
- Foot & leg protection
- Plant/insect cream or spray
- Other: ___________________

### 4. Specific Controls (other than PPE):

*In the space below describe any special controls that will be utilized to protect employees from the hazards.*

Please list any observation notes or other comments below (Please let project PI or Operations Support know if an RSS update is needed based upon observations):

Do you need Operations or Safety Services to follow up?  
Yes □  No □

*If YES please return this card to a member of your Ops Support Team with your follow up request stated in the notes section above.*

Project Lead/Task Leader: ____________________________

Division: _______________    Date: ________________

- Ask if anyone has questions (verify that all employees understand the scope of work, the hazards, and controls).
