**Subject:** **National Environmental Policy Act (NEPA) Review of Project: FY 2011  
Environmental Science Division, Spruce and Peatland Responses Under  
Climatic and Environmental Change Experiment (SPRUCE) (3627X)**

Attached is a copy of the completed Environmental Assessment and signed Finding of No Significant Impact for the subject project. This document contains the data obtained in the assessment of the project and represents a current profile of the planned action and its potential impacts. The data in the EA have been entered into the Oak Ridge National Laboratory (ORNL) NEPA Compliance Database, which constitutes a permanent repository of auditable UT-Battelle actions assessed under NEPA.

Any changes in the scope of this project should immediately be reported to Wes Goddard (576-5749). Variations in the project could result in a change in the NEPA status of your action. It is the responsibility of the project manager/engineer to report any modifications of the action to the NEPA Coordinator. Failure to report changes in your project could result in noncompliance with NEPA.

If you have any questions, please contact Wes Goddard (576-4211).
